Dear Sir \ Madam,

Let me introduce myself, my name is Robert Brown and I own and run an IT business developing and hosting websites for local businesses in South East England.

In an age where searching the internet has become the main method for finding a business or service provider, the need for a presence on the internet is becoming a necessity rather than just an ideal.

For Example:

- A potential client is searching for a product or service when they find a well designed and easy to navigate website.
- The information is clear and easy to read and provides the visitor everything they need to know about the product and the business selling the product.
- Providing the right information allows them to make an informed decision which potentially leads to a sale.
- **Excellent!**

If your business doesn't have a website; this means they have just purchased from a competitor.

So ask yourself:

- Where would a potential customer find your business information?
- Where could they view and read about your products?

All this information is used to make informed decisions and without it, running a business can be a tough task especially in today's market.

To help maximise your company's potential we are offering tailored solutions by providing your business with the opportunity to have your very own website.

www.yourcompanyname.co.uk could be providing potential customers to buy from you and not your competitors!

For further information please contact Rob on: 07776 175233 or visit www.uinternet.co.uk

Yours faithfully

Robert Brown
Director
UInternet Ltd
